REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relates to a magnetic memory device. The independent claims 1 and 13 recite a magnetic memory cell comprising an insulating layer disposed between the first and second ferromagnetic layers, the insulating layer in combination with the first and second ferromagnetic layers forming a tunneling diode such that leakage currents are prevented. The independent claims 8 and 19 recite a method of reading a memory structure comprising generating a first current during a first read cycle, the first current flowing from a column line through the memory structure to a row line; and generating a second current during a second read cycle, the second current flowing from the row line through the memory structure to the column line. The PRIOR ART fails to disclose or suggest such a memory cell with tunneling diode to prevent leakage current as described in the independent claims 1 and 13 and a method of reading a memory structure with reverse current in the next reading cycle as described in the independent claims 8 and 19, therefore, claims 1-22 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu A. Le whose telephone number is (571) 272-1871. The examiner can normally be reached on M-F (7:00-3:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (571) 272-1869. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
